**4. FIRST AID MEASURES**

---

<b>Skin Contact:</b>	Wash the affected skin with soap and water. Consult a physician in case of persistent pain or redness.
<b>Eye Contact:</b>	Flush with running water for several minutes while keeping the eyelids wide open. Consult an ophthalmologist in case of persistent pain.
<b>Ingestion:</b>	Unknown symptoms: consult a physician for advice.
<b>Inhalation:</b>	Remove the subject from the contaminated area. Administer oxygen or cardiopulmonary resuscitation if necessary. Consult a physician in case of respiratory or nervous symptoms.
<b>If the Subject is Completely Conscious:</b>	Rinse mouth and administer fresh water.
<b>If the Subject is Unconscious:</b>	Not applicable.
<b>Medical Treatment/Notes to Physician:</b>	None.

---

**5. FIRE FIGHTING MEASURES**

---

<b>Flash Point:</b>	-10.5 °C (closed cup)
<b>Auto-Ignition Temperature:</b>	No data
<b>Flammability Limits:</b>	No data
<b>Unusual Fire and Explosion Hazards:</b>	Explosion possible with gas vapor and air mixture (See Section 10).
<b>Extinguishing Methods:</b>	Use powder. Foam, AFFF. CO <sub>2</sub> extinguisher. Do not use water extinguisher.
<b>Fire Fighting Procedures</b>	
<b>Specific hazards:</b>	Flammable (see Section 9). Formation of dangerous gas/vapors in case of decomposition (see Section 10). Gas/vapors are heavier than air and so may travel along the ground; remote ignition possible. Gas/vapors explosion possible in presence of air.
<b>Protective measures</b>	
<b>in case of intervention:</b>	Evacuate all non-essential personnel. Wear self-contained breathing apparatus when in close proximity, or in confined spaces. After intervention, take a shower, remove clothing carefully, clean and check the equipment. Intervention only by capable personnel who are trained and aware of the hazards of the product. When intervention in close proximity, wear acid-resistant over-suit.
<b>Other precautions:</b>	If safe to do so, remove the exposed containers, or cool with large quantities of water. Approach from upwind. As for any fire, ventilate and clean the rooms before reentry. After the fire, proceed rapidly to clean the surfaces exposed to the fumes in order to limit the damage to the

equipment. Avoid propagating the fire when directing the extinguishing means in a jet on the surface of the burning liquid.

---

## 6. ACCIDENTAL RELEASE MEASURES

---

### Personal Precautions:

Follow the protective measures given in Sections 5 and 8. Keep materials and products away that are incompatible with the product (see Section 10).

Eliminate all sources of ignition, and do not generate flames or sparks. If safe to do so, without overexposing anyone, try to stop the leak. Approach from upwind. Disperse gas/vapors with water spray. Protect intervention team with water spray.

### Environmental Precautions:

Prevent discharges into the environment

### Cleanup Procedures:

If possible, dam large quantities of liquid with sand or earth. Prevent the product from entering sewers or confined places. Place everything in a closed, labeled container compatible with the product. Store the product in a safe and isolated place. For disposal methods, refer to Section 13. Collect the product with suitable means. Clean the area with large quantities of water.

---

## 7. HANDLING AND STORAGE

---

### Handling:

Carry out industrial operations in closed piping circuits and equipment. Operate in a well-ventilated area. Prevent decomposition of product vapors by eliminating contact with hot spots. Keep away from heat sources. Keep away from reactive products (see Section 10). Handle small quantities under a lab hood. Do not use tools that produce sparks. Use only equipment and materials that are compatible with the product.

### Storage:

Store in a ventilated, cool area. Keep away from heat sources. Keep away from reactive products (see Section 10). Provide containment around storage containers and transfer installations.

For bulk storage, consult the producer.

### Specific Uses:

For any particular use, please contact the supplier.

### Other Precautions:

No open flames or sparks, no smoking. Follow the protective measures given in Section 8. Use electrically grounded equipment. Warn people about the dangers of the product. Prevent electrostatic discharges. Provide electrical equipment safety for hazardous locations.

---

## 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

---

<b>Exposure Limit Values:</b>	None listed
<b>Authorized Limit Values:</b>	None listed
<b>Exposure Controls:</b>	Follow the protective measures given in Section 7. Provide premise ventilation. Respect local, state, and national regulations for aqueous emissions
<b>Occupational Exposure Controls:</b>	
<b>Ventilation:</b>	Provide local ventilation suitable for the emission risk.  Respiratory protection: Minimum needed if the local exhaust ventilation is adequate.  Use self-contained breathing apparatus in confined areas and areas with insufficient oxygen.  Use self-contained breathing apparatus in cases of large, uncontrolled emission or in all circumstances when the mask and cartridge do not give adequate protection. Use only respiratory protection that conforms to international and national standards.
<b>Hand protection:</b>	Chemical – resistant protective gloves (Neoprene).
<b>Eye protection:</b>	Wear protective goggles for all industrial operations.
<b>Skin protection:</b>	Overalls. Use apron/boots of butyl rubber if there is risk of splashing.
<b>Other precautions:</b>	Provide shower and eye wash stations.  Consult the industrial hygienist or the safety manager for the selection of personal protective equipment suitable for the working conditions.  Do not smoke, eat, or drink in the working area.
